

Southeast Subcommittee Meeting Notes September 20, 2005

The Southeast subcommittee met to revisit aspects of the subcommittee exercises that had yet to be completed. This subcommittee had not completed the Institutional component of the Criteria for Development exercise. Recommendations for Institutional uses included providing institutions with a high degree of accessibility, both from vehicles and non-motorized methods; making use of institutions as transitional opportunities between dissimilar land uses; encouraging institutions to locate where additional property existed for future expansion; and sensitivity to surrounding uses in terms of the design of the structures and the impacts of the use itself.

The issue of establishing a cohesive Vision Statement for the Southeast subcommittee was the second topic addressed, and group members determined revisions to the existing Vision Statement were called for. The compilation of the proposed revisions was left to staff, with the understanding that the final completed Vision Statement would be included in the report presented to the full Steering Committee.

A first attempt at a summary of the input of the group was provided to the group members, and the group members were invited to review the document and propose changes. Group members were informed that a copy of the report would be provided via e-mail. The remaining steps in the Steering Committee process were explained to the group. The participants were thanked for their involvement, and the group members were all encouraged to attend future Steering Committee meetings.

Next Meeting: October 18, 2005 at 7pm at Oak Trace Elementary School
